June 11, 2010

Helping Divorcing Families: Interventions that Work

Rhonda Freeman
Halifax, Bethune Bldg, University & South Park Streets

This workshop will increase knowledge and skills for therapeutic work that supports good outcomes for children when parents separate and divorce.

October 29, 2010

Being a Brain-Wise Therapist

Bonnie Badenoch, Ph.D., LMST

Dr. Badenoch is President of GAINS (Global Association for Interpersonal Neurobiology Studies), and a long-time student of Dr. Daniel J. Siegel. She is founder of Center for Hope and Healing in California, which provides therapy for families suffering with intergenerational legacies of abuse, neglect, attachment struggles, and emotional pain. As a clinician, she has worked primarily with survivors of severe abuse and neglect. This workshop will look at the developing brain and the neurobiology of attachment and how this can increase our effectiveness as therapists.

2011

February 25, 2011
