PROFILE

Dr. Beverly Butler specializes in clinical neuropsychological assessment and rehabilitation of adults after traumatic brain injury, stroke, and other neurological or medical conditions.

Dr. Butler has a Ph.D. in Clinical Psychology from Dalhousie University. She currently divides her time between her clinical practice at GPS and a research position in the Department of Psychiatry at Dalhousie University and Capital Health. She has been very active in recent years researching attention difficulties after right-hemisphere stroke and remains committed to researching cognition after acquired brain injuries.
